About Us

Founded in 2017, SMG helps organizations navigate digital change with clarity and confidence. As part of CTI Group, we deliver practical and secure technologies that support real business growth.

In 2023, we have served around 45 clients from various industries such as Banking, Multifinance, State Own Company, Healthcare, Retail, Service, and many more.

In 2025, we achieved our new status as **Google Cloud Premier Partner**

Vision

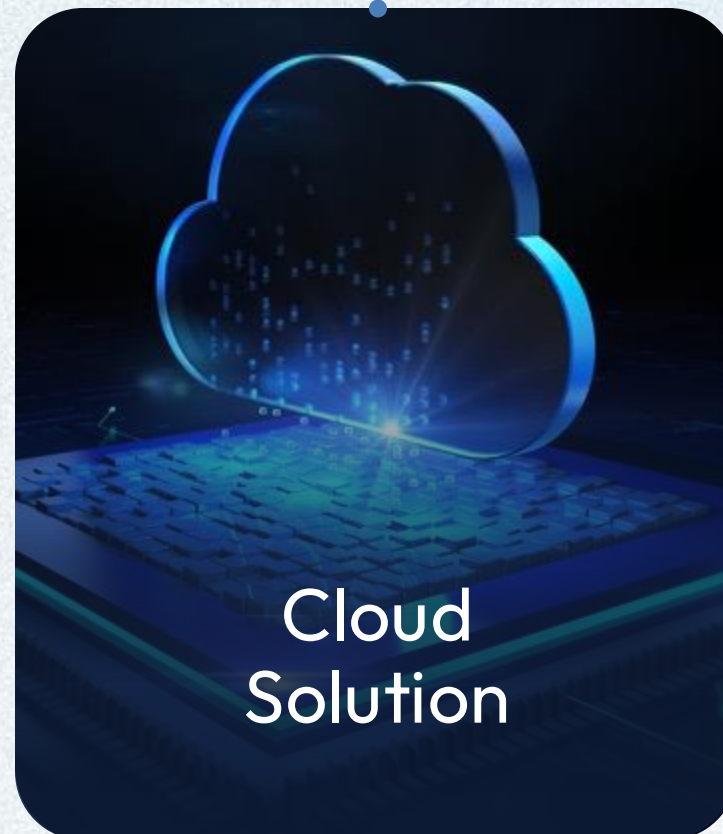

To become a trusted IT partner that helps businesses navigate digital transformation with confidence and clarify.

Mission

To deliver practical cloud, security, and digital solutions that enable businesses to adapt faster, operate efficiently, and grow in a constantly evolving digital landscape.

Key Solutions

Build, scale, and innovate faster with a secure and flexible cloud platform for data, analytics, and AI-driven workloads.

Enable seamless collaboration with integrated email, chat, video meetings, and document sharing, securely, anytime, anywhere.

Gain deeper threat visibility and faster response to protect your environment from modern cyber threats.

Leverage location-based intelligence to improve decision-making, optimize operations, and enhance customer experiences.

Our Service Portfolio

Explore our end-to-end service portfolio designed to support digital transformation across every layer of the cloud.

We help businesses modernize infrastructure and applications, while unlocking innovation through data analytics and Artificial Intelligence without added complexity.

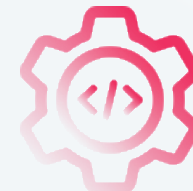

Cloud Solution

From core systems to advanced analytics, SMG delivers practical capabilities that help organizations build a secure, scalable, and future-ready cloud foundation.

Use Case: Application Analytics and Data Warehouse

Transportation Industry

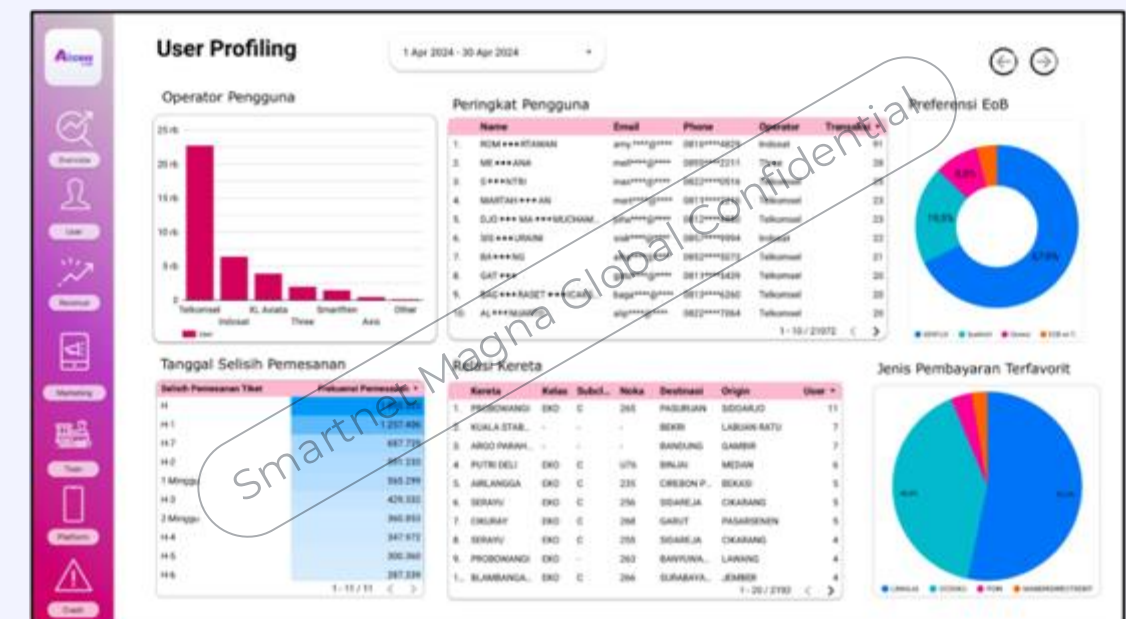

The Challenge

- Data silos limited unified analysis of sales and customer behavior
- Limited analytics expertise and slow reporting processes

Solution & Impact

- ✓ Real-time analytics using BigQuery, Firebase, and Looker Studio
- ✓ 27% faster reporting and 30% higher team productivity
- ✓ Unified insight for better decisions and customer experience

Use Case: Application Analytics and Data Warehouse

Transportation Industry

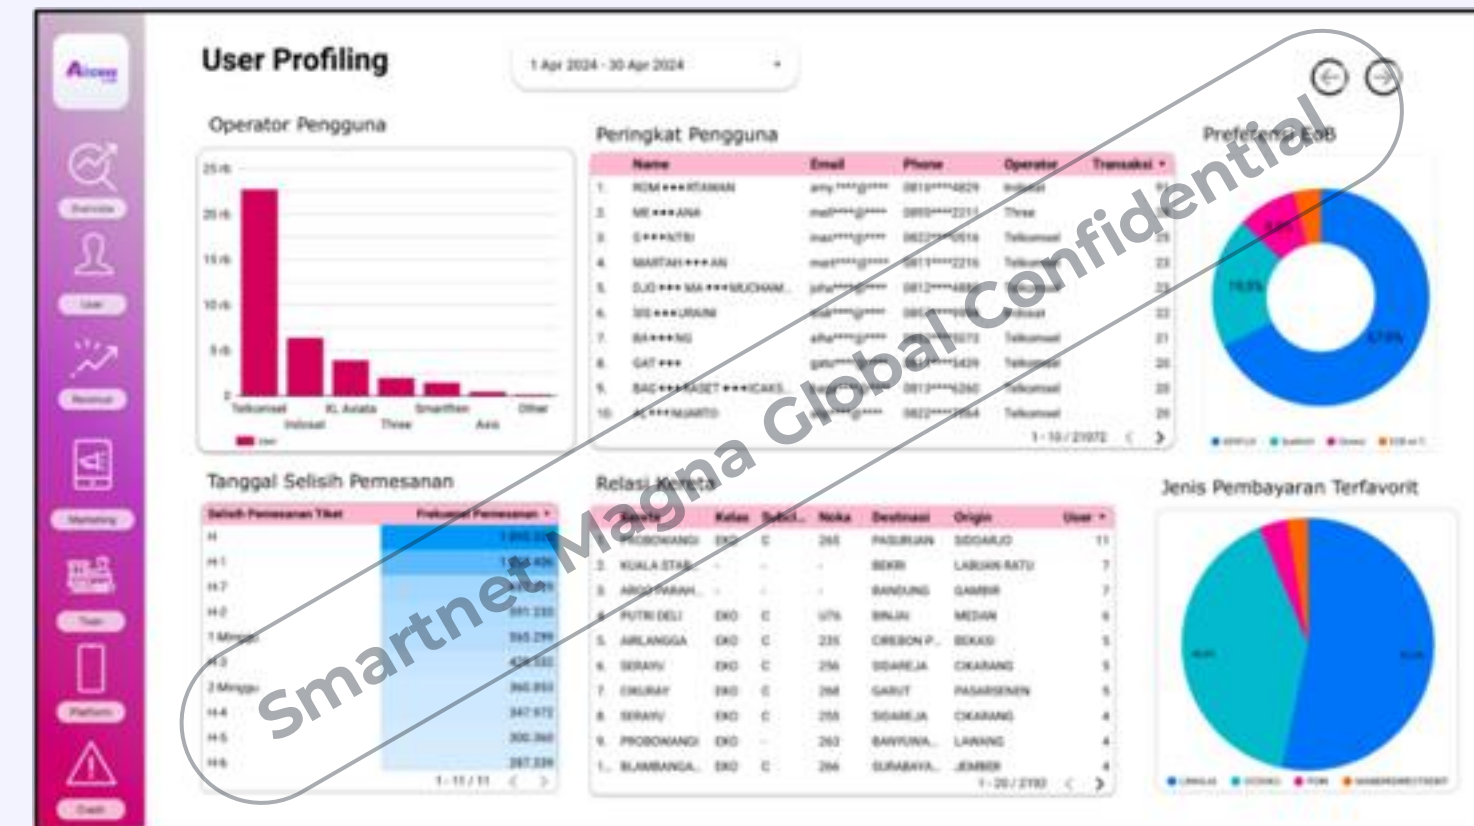

The Challenge

- **Data silos** limited unified analysis of sales and customer behavior
- **Limited analytics** expertise and slow reporting processes

Solution & Impact

- ✓ **Real-time analytics** using BigQuery, Firebase, and Looker Studio
- ✓ **27% faster** reporting and **30% higher** team productivity
- ✓ **Unified insight** for better decisions and customer experience

Use Case: BI & Analytics Dashboard

Transportation Industry

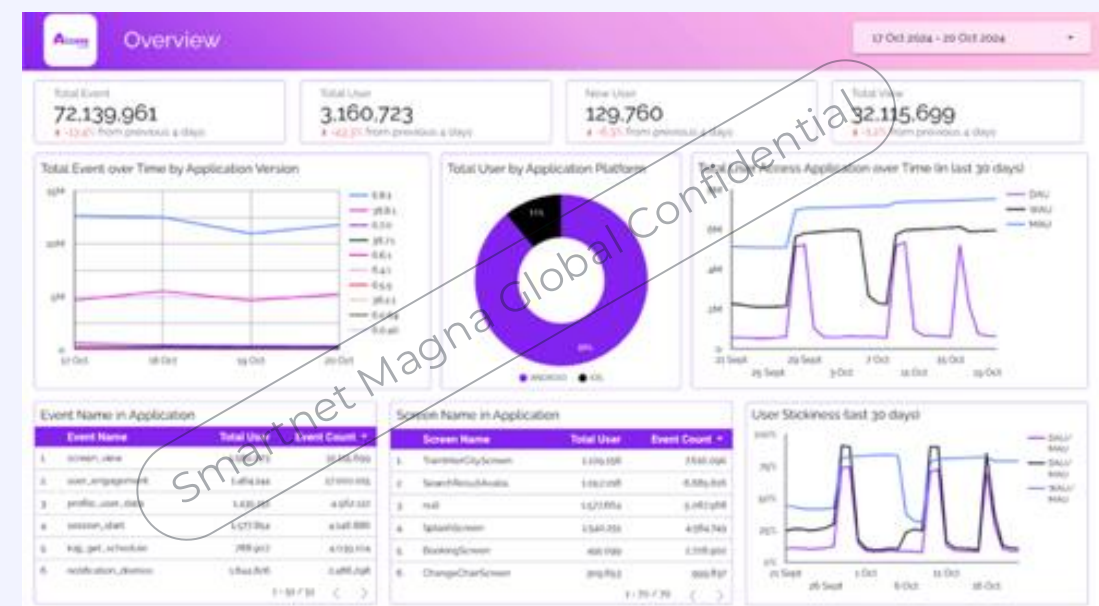

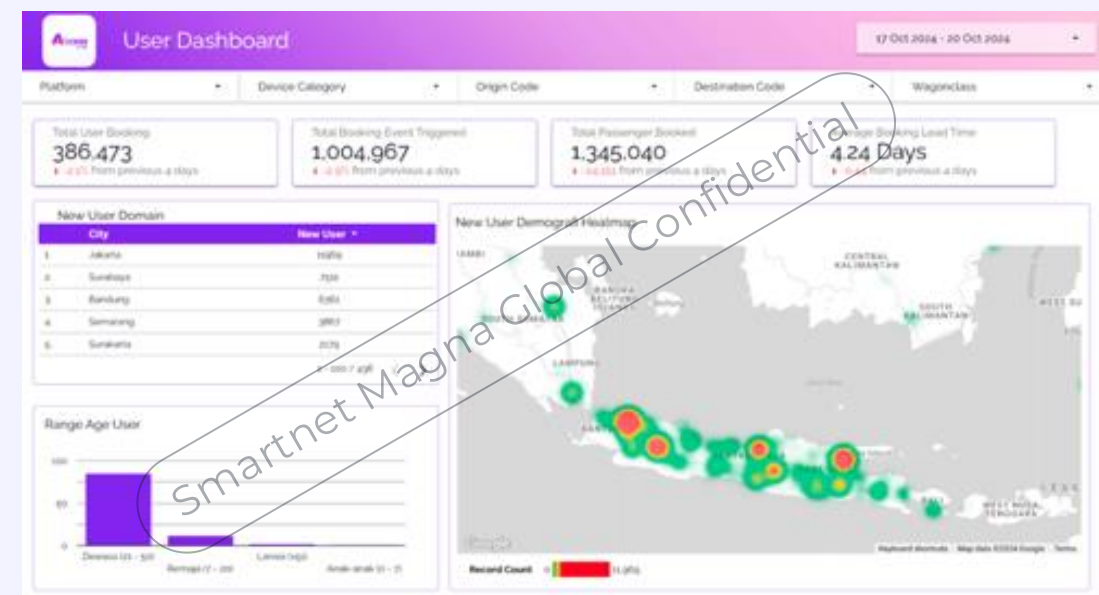

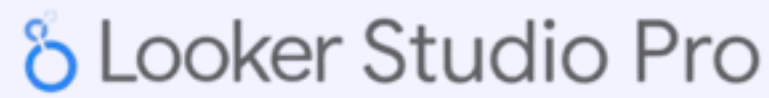

The Challenge

- Sales and user data stored separately
- Manual reporting slowed decisions and reduced agility

Solution & Impact

- ✓ Automated dashboards with Looker Studio Pro and BigQuery ML
- ✓ Processed 115M events, tracked 2.6M users, analyzed 1.7M bookings
- ✓ Improved reporting efficiency and targeted marketing

Use Case: BI & Analytics Dashboard

Transportation Industry

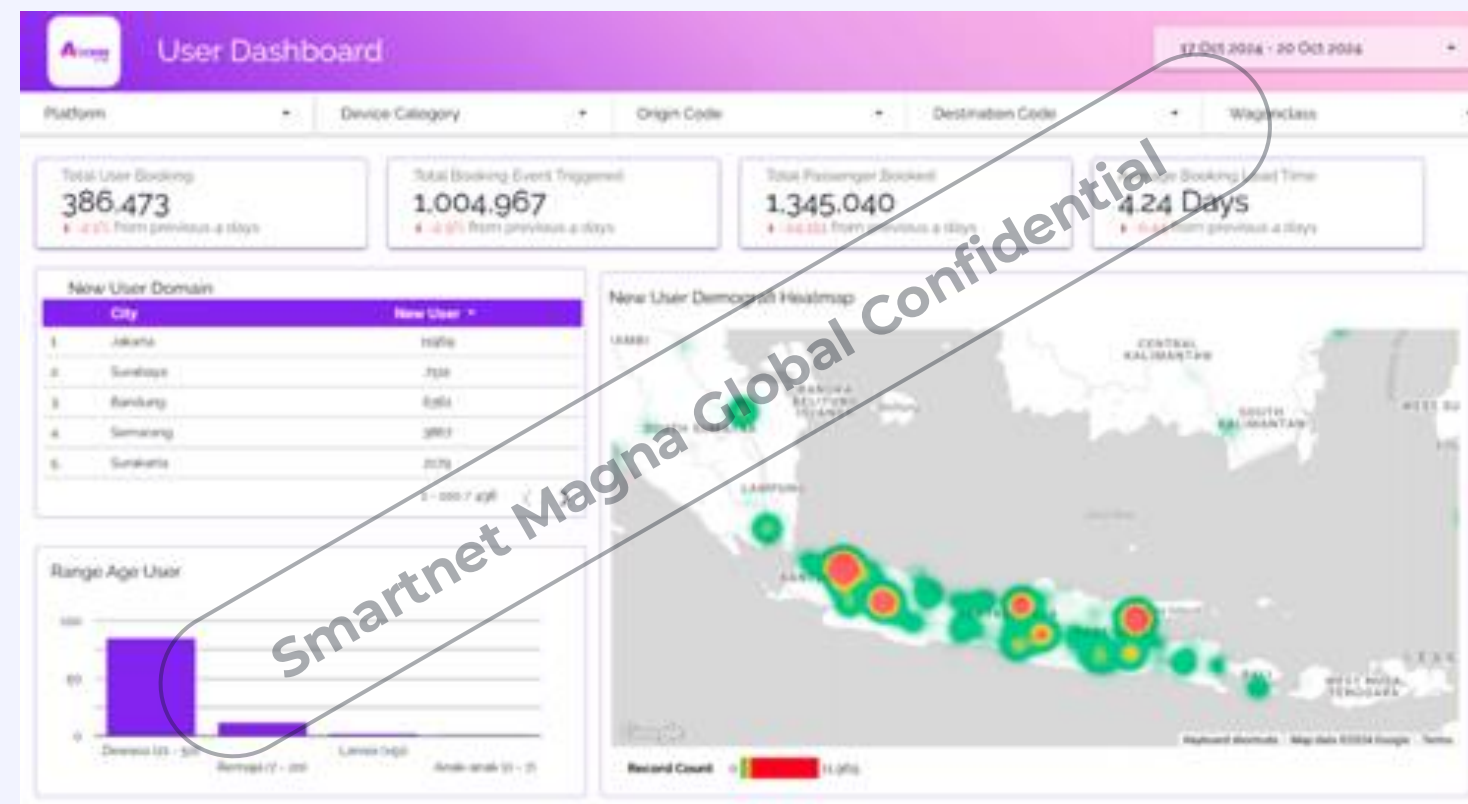

The Challenge

- Sales and user data stored separately
- Manual reporting slowed decisions and reduced agility

Solution & Impact

- ✓ Automated dashboards with Looker Studio Pro and BigQuery ML
- ✓ Processed 115M events, tracked 2.6M users, analyzed 1.7M bookings
- ✓ Improved reporting efficiency and targeted marketing

Use Case: AI-Powered Procurement Intelligence

Transportation Industry

The Challenge

- Difficult market research from historical procurement data
- Vendor data is scattered across thousands of documents
- Limited visibility into unstructured technical information

Solution & Impact

- ✓ MALIKA on Cloud Run with BigQuery and Gemini AI
- ✓ Fast document comparison and **real-time** procurement insights
- ✓ Improved accuracy, transparency, and operational visibility

Use Case: AI-Powered Procurement Intelligence

Transportation Industry

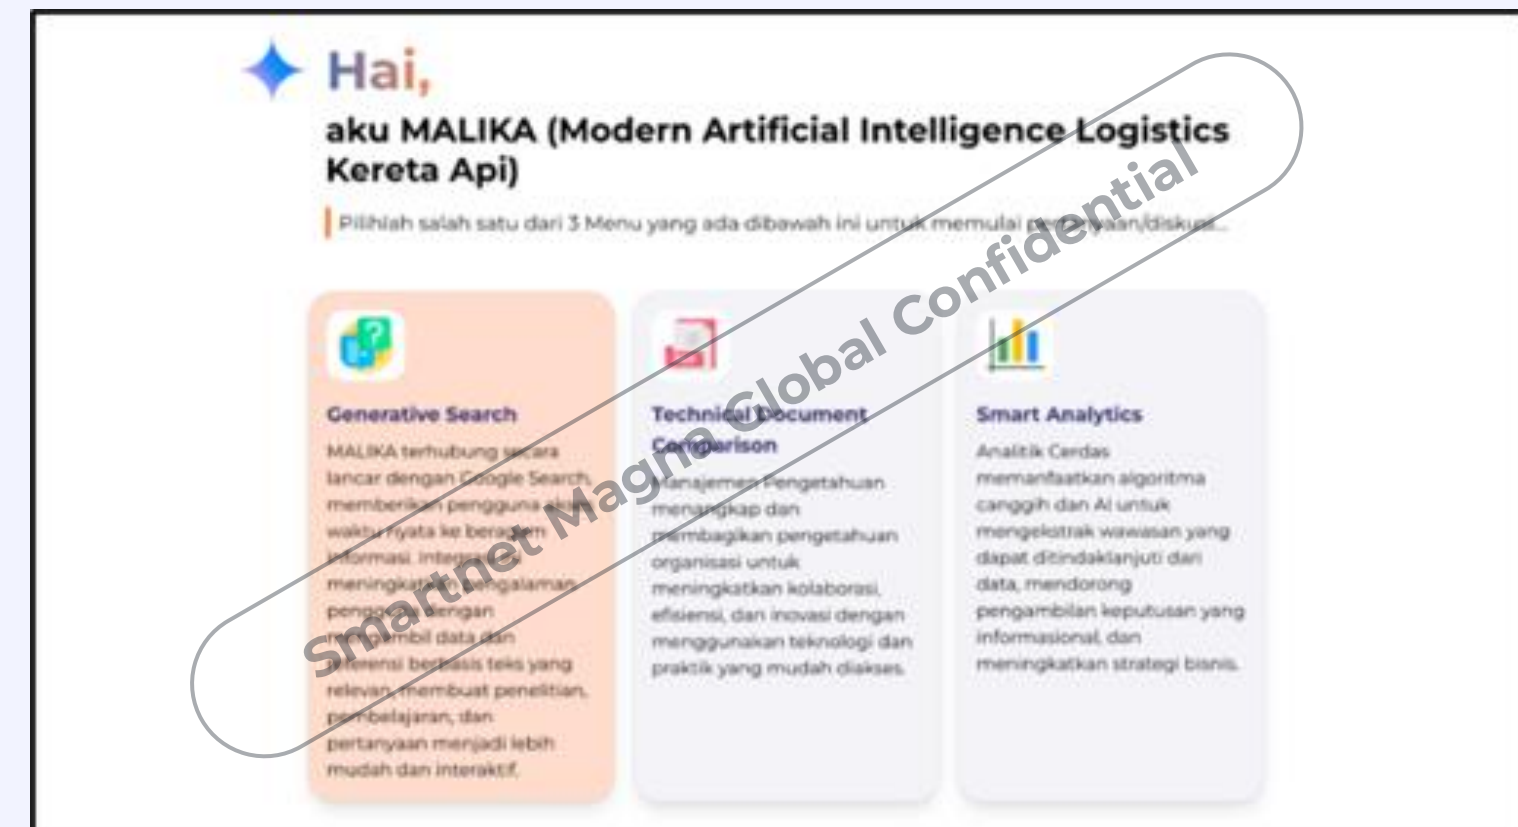

The Challenge

- Difficult market research from historical procurement data
- Vendor data is scattered across thousands of documents
- Limited visibility into unstructured technical information

Solution & Impact

- ✓ MALIKA on Cloud Run with BigQuery and Gemini AI
- ✓ Fast document comparison and **real-time** procurement insights
- ✓ **Improved** accuracy, transparency, and operational visibility

Use Case: 24/7 ETL Monitoring Managed Services

Banking Industry

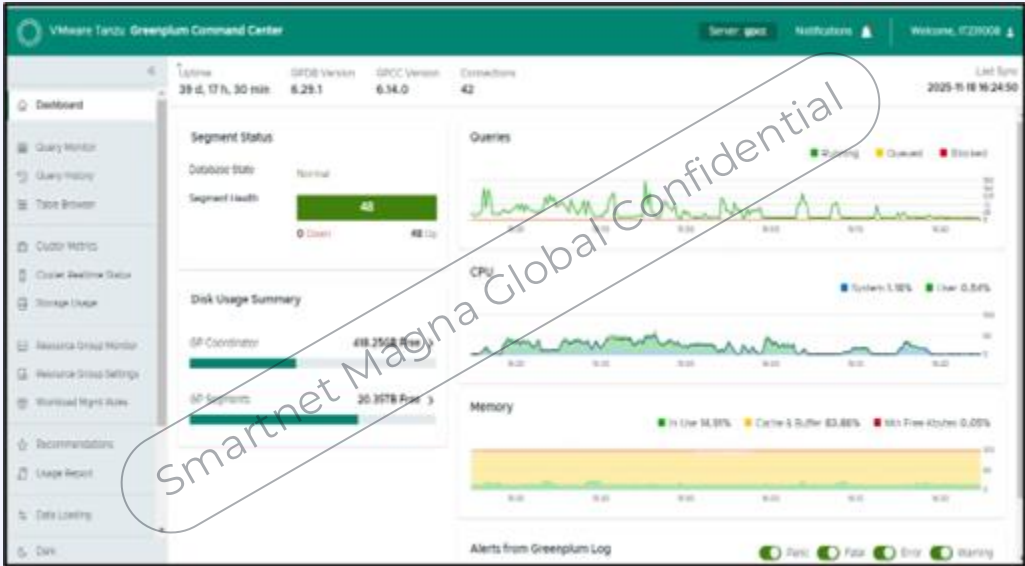

The Challenge

- 250+ daily ETL pipelines managed by only 2 internal IT staff
- Frequent SLA breaches on mission-critical pipelines
- Reactive firefighting reduced focus on strategic initiatives

Solution & Impact

- ✓ 24/7 monitoring with automated diagnostic and escalation
- ✓ 85% fewer critical failures and 99.9% SLA compliance
- ✓ MTTR reduced to under 25 minutes, freeing 400 hours/month

Use Case: 24/7 ETL Monitoring Managed Services

Banking Industry

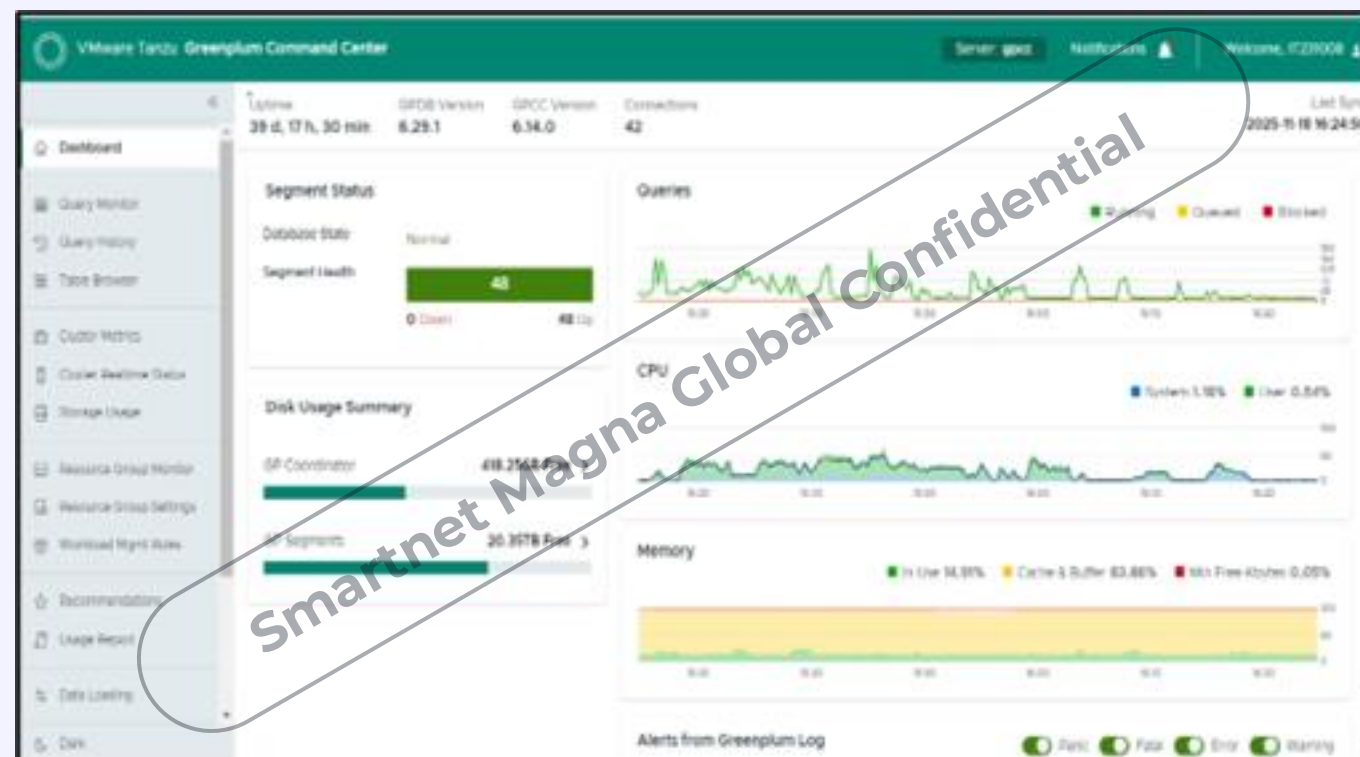

The Challenge

- 250+ daily ETL pipelines managed by only 2 internal IT staff
- Frequent SLA breaches on mission-critical pipelines
- Reactive firefighting reduced focus on strategic initiatives

Solution & Impact

- ✓ 24/7 monitoring with automated diagnostic and escalation
- ✓ 85% fewer critical failures and 99.9% SLA compliance
- ✓ MTTR reduced to under 25 minutes, freeing 400 hours/month

Use Case: Near-Real Time Reporting Analysis

Manufacture Industry

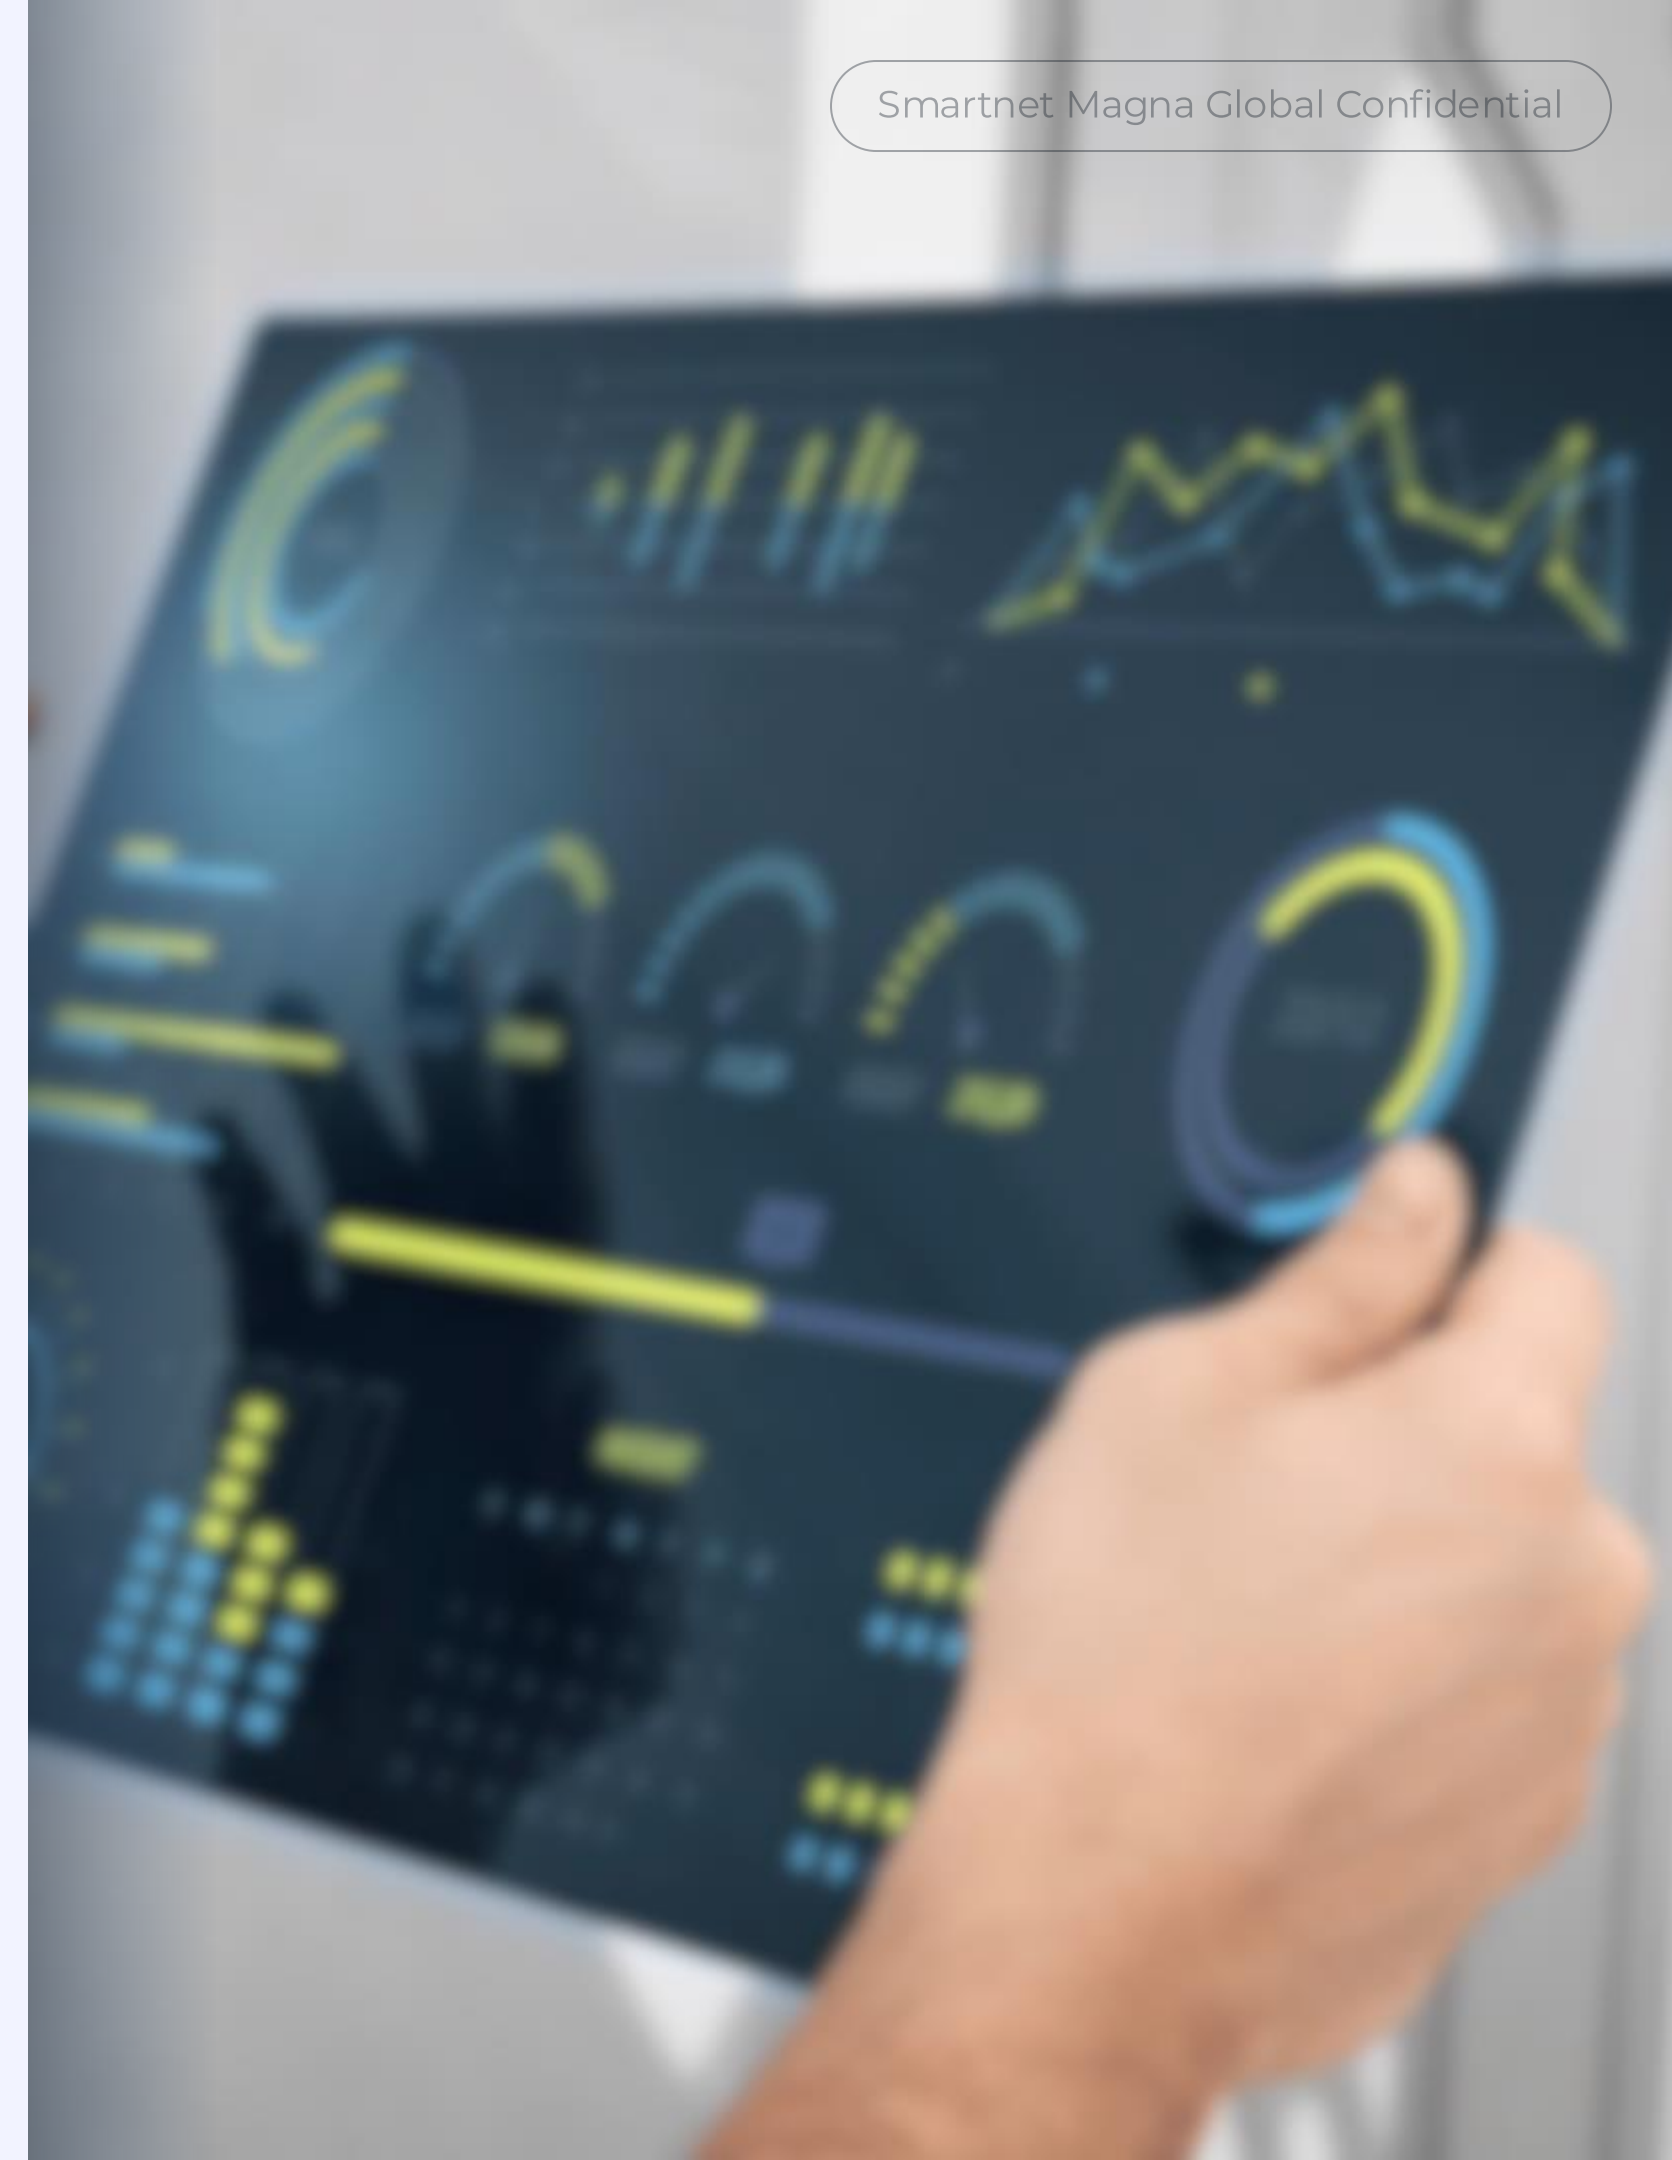

The Challenge

- Sales data from 1,200+ stores arrived up to 2 hours late
- Limited real-time visibility into performance and inventory

Solution & Impact

- ✓ Cloud-native pipeline with Datastream, Dataflow, and BigQuery
- ✓ Dashboard updates in 1 minute, latency under 10 minutes
- ✓ Improved operational agility and AI readiness

Use Case: Near-Real Time Reporting Analysis

Manufacture Industry

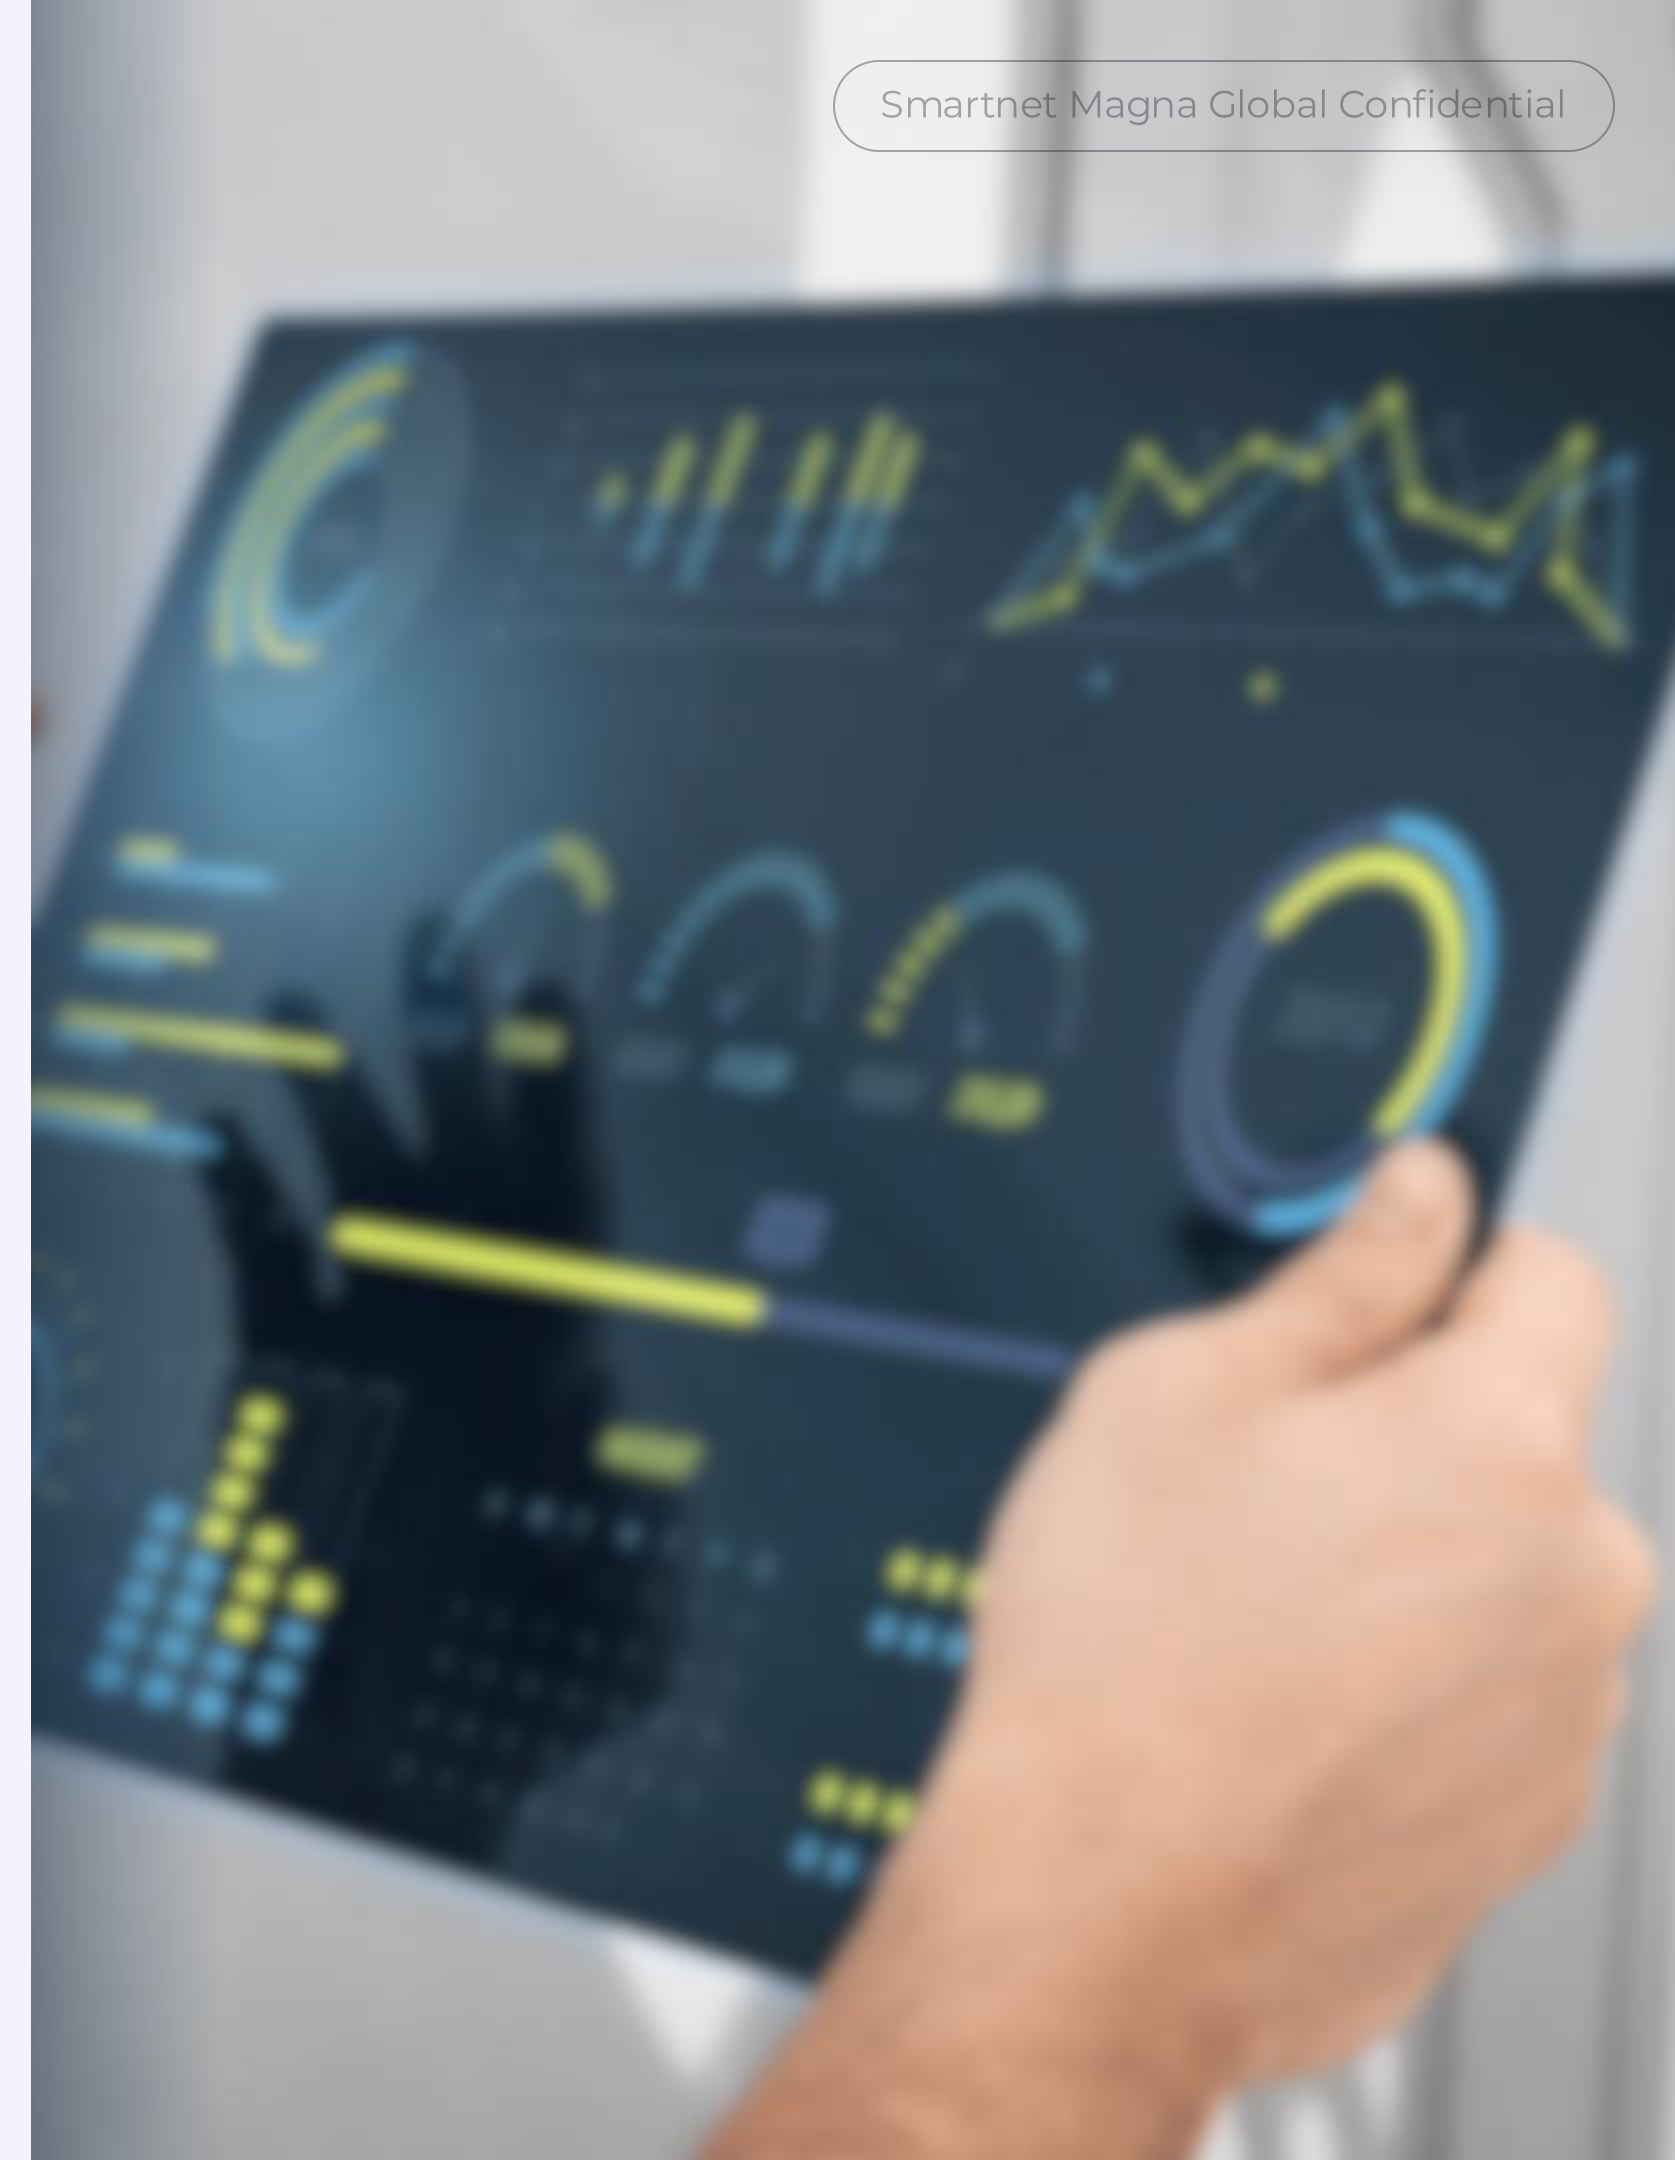

The Challenge

- Sales data from 1,200+ stores arrived up to 2 hours late
- Limited real-time visibility into performance and inventory

Solution & Impact

- ✓ Cloud-native pipeline with Datastream, Dataflow, and BigQuery
- ✓ Dashboard updates in 1 minute, latency under 10 minutes
- ✓ Improved operational agility and AI readiness

Use Case

IT Infrastructure Solutions

Use Case: Enterprise Wired & Wireless LAN for Healthcare

Scenario: Hospitals require fast, secure network access to support EMR, medical imaging, and clinical systems while meeting healthcare compliance standards.

How It Works

High-Speed Access

Wi-Fi 6 enables instant access to EMR and medical images for clinical staff.

High-Density Support

Stable connectivity for hundreds of medical and IoT devices in busy clinical areas.

Secure Connectivity

WPA3 encryption protects patient data and supports compliance requirements.

Outcome

Reliable and secure hospital connectivity that supports clinical efficiency and data protection.

Use Case

Security Management Solutions

Use Case: EPM for Corporate Environment

Scenario: In a corporate environment, employees need to stay productive, IT teams must keep systems secure, and third-party vendors may require limited, temporary access.

How EPM Works

Remove Local Admin Rights

Standard users no longer have full admin privileges, reducing malware and unauthorized system changes.

Just-In-Time Privilege Access

Temporary elevated access is granted only for specific tasks when needed.

Smart Application Control

Trusted apps run automatically, while unknown or risky apps are blocked, sandboxed, or approved once.

Outcome

Stronger endpoint security with minimal impact on daily operations.

Use Case: PAM for Banking Assets

Scenario: Banks manage numerous privileged accounts with access to critical financial systems.

How PAM Secures Privileged Access

Automated Password Management

Privileged passwords are securely stored and automatically rotated.

Real-Time Session Monitoring

All sessions are monitored and recorded, with suspicious activity stopped instantly.

Complete Audit Trail

Every action is logged in a tamper-proof record for compliance and investigations.

Outcome

Controlled privileged access, reduced insider risk, and stronger regulatory compliance.

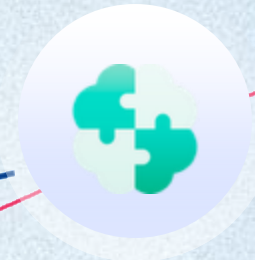

Customer Success Story

Real Estate Industry

Challenge

Inconsistent IT security standards across business units increased risk of exposure.

Solution

SMG deployed Endpoint Security and Next-Generation Antivirus (NGAV), replacing legacy signature-based protection with centralized monitoring, faster policy deployment, and hands-on IT guidance.

Result

- ✓ Real-time security monitoring via cloud portal
- ✓ Policy deployment reduced from weeks to days
- ✓ Improved IT visibility, confidence, and independence
- ✓ Stronger overall security posture

Product Used/Delivered

- ❖ Endpoint Security
- ❖ Next-Generation Antivirus (NGAV)

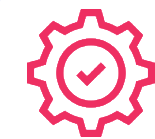

Discover SMG as Your Services Partner

Implementation

Fast, reliable deployment tailored to your business requirements.

Preventive & Corrective Maintenance

Proactive monitoring and quick issue resolution to keep operations running smoothly.

Cloud Managed Services

24/7 cloud management and optimization to ensure performance, security, and stability.

Cloud Migration Services

Smooth and secure cloud migration with minimal business disruption.

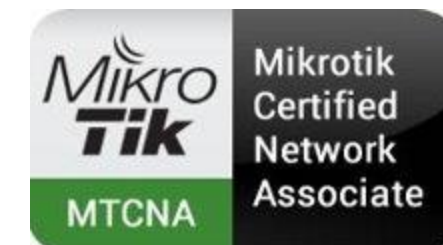

Technology Partners / Delivered Products

We collaborate with leading global technology partners to deliver trusted, scalable, and future-ready IT solutions for your business.
